COLLEGE OF COMPUTER STUDIES

March 12, 2018

Dear Respondents:

Greetings!

We, the Fourth Year Students from University of Perpetual Help System- Jonelta GMA Campus, are requesting for your time to evaluate our system project entitled: *"The Development of Exam Scheduling and Information System of University of Perpetual Help System-GMA College Department"* as partial requirements for the degree of Bachelor of Science in Information Technology.

The attached questionnaire will measure the effectiveness of the system in terms of Functionality, Reliability, Usability, Efficiency, Maintainability, and Portability. We assure that any information gathered would be handled properly and with strict confidentiality

Thank you very much and God bless you always!

Respectfully yours,

Garfunkel C. Vila
Group Representative

Noted by:

Mrs. Mary Grace N. Barbecho
Thesis Adviser

Part I Respondents Profile

Direction: Supply the information Requested below by writing on the space or by checking (✓) the appropriate box, which corresponds to your answer.

Name (optional): _____			
Age (as of last birthday)			
<input type="checkbox"/> 16 – 20 yrs. old	<input type="checkbox"/> 26 – 30 yrs. old	<input type="checkbox"/> 36 – 40 yrs. old	<input type="checkbox"/> 46 yrs. old and above
<input type="checkbox"/> 21 – 25 yrs. old	<input type="checkbox"/> 31 – 35 yrs. old	<input type="checkbox"/> 41 – 45 yrs. old	
Gender			
<input type="checkbox"/> Male			
<input type="checkbox"/> Female			
Profession			
<input type="checkbox"/> System Analyst	<input type="checkbox"/> Computer Programmer	<input type="checkbox"/> Other Please Specify: _____	
<input type="checkbox"/> Computer Engineer	<input type="checkbox"/> Data Administrator		
<input type="checkbox"/> Graphics Designer	<input type="checkbox"/> End User		

Part II Software Characteristic

Direction Based on “The Development of Exam Scheduling and Information System of University of Perpetual Help System – GMA Campus”, answer following questions as completely, honestly and accurately as you check (✓) the appropriate box using the following scale:

Legend:

- 5 – Strongly Agree
- 3 – Slightly Agree
- 1 – Strongly Disagree
- 4 – Agree
- 2 – Slightly Disagree

Functionality*

1. Suitability: The system can run through different web browsers.

2. Accuracy: The system gives precise data.

3. Security: The system can only be access by the registered users.

5

4

3

2

1

☐

☐

☐

☐

☐

Reliability*

4. Maturity: The system is fully functional upon the final implementation/deployment stage.

5. Fault Tolerance: The system provides error messages for incorrect input of data.

6. Recoverability: The system can regain updated records of the users from the database.
Power loss does not affect the system’s database.

5

4

3

2

1

☐

☐

☐

☐

☐

Usability*

7. Understandability: The system uses terminologies that can be understand by the users. The system also provides clues mostly on buttons and fields.

8. Learnability: The system is user-friendly when it comes to its interface and functions, less assistance from the developer.

9. Operability: The feasibility of the system helps the end-user to understand the system easily.

10. Attractiveness: The system is amiable and pleasing to the eyes of the user/s.

5

4

3

2

1

☐

☐

☐

☐

☐

Efficiency*

11. Time Behavior: The system reacts completely with every performance from the user.

12. Resource Utilization: The system gives the same method of gathering information manually to the pilot area.

5

4

3

2

1

☐

☐

☐

☐

☐

Maintainability*

13. Analyzability: Managing the system is not too difficult to apprehend.

14. Changeability: Flexibility of the system responds to the user thoroughly.

15. Stability: Steadiness of the system is reliable.

16. Testability: The system can run 100% with the user’s performance.

5

4

3

2

1

☐

☐

☐

☐

☐

Portability*

17. Adaptability: Transporting the system to other Operating System is versatile.

18. Installability: Doesn’t require high computer specification.

19. Conformance: Capability of the System depends on the user’s performance.

20. Replaceability: Data migration and system updating is inessential.

5
